100% of the time, the system will be able to correctly identify the subject in the image.

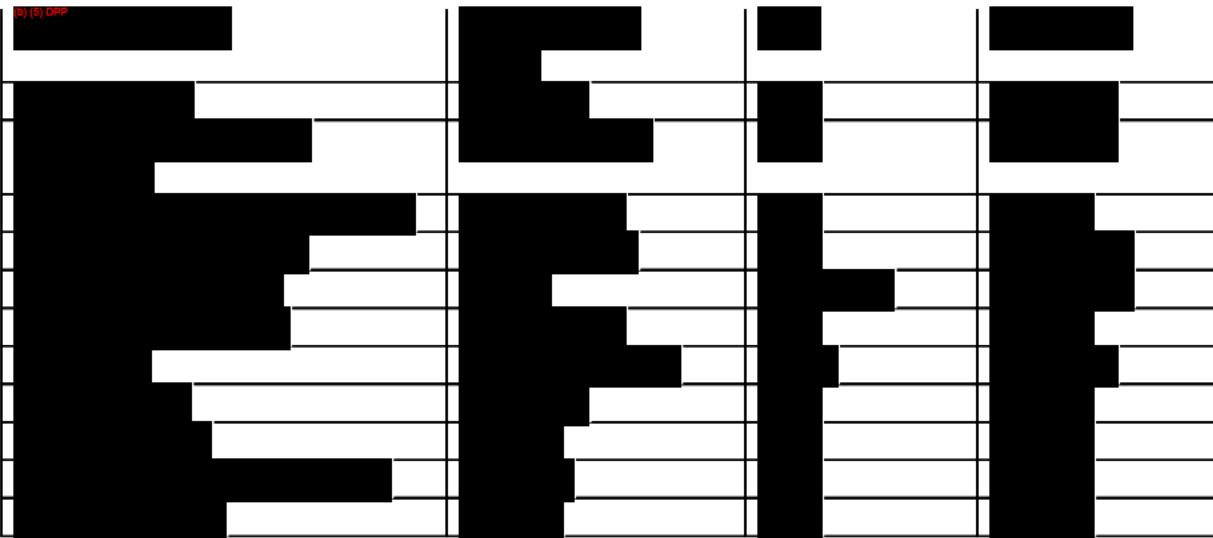

[REDACTED]

A bar chart illustrating the distribution of a variable across eight categories. The y-axis is marked with seven tick positions, each preceded by a dot. The x-axis represents a scale from 0 to 100. Category 1 contains a small white bar reaching approximately 10. Categories 2 through 7 are represented by thick black bars extending to 100. Category 8 features a thick black bar ending at approximately 95 and a small white bar extending to approximately 5.

[REDACTED]

[View Details](#) | [Edit](#) | [Delete](#)

The figure displays a 4x10 grid of binary matrices, representing the evolution of a sparse matrix over time. The columns represent time steps, and the rows represent matrix entries. A value of 1 indicates the presence of an element, while 0 indicates its absence. The evolution shows the growth and movement of non-zero elements across the matrix.

A long horizontal black redaction bar is positioned in the middle section of the page, extending across most of the width.

A second long horizontal black redaction bar is located further down the page, also extending across most of the width.

A 15x4 grid of black and white bars. The bars are composed of horizontal segments of varying lengths. The pattern repeats every four rows. In each group of four rows, the first bar has a segment of length 1 at position 1. The second bar has a segment of length 2 at position 2. The third bar has a segment of length 3 at position 3. The fourth bar has a segment of length 4 at position 4. This pattern continues for all 15 rows.
